Earth Science Category: Quaternary & Geomorphology

Geology 1:50,000: BGS Sheet 231, Merthyr Tydfil

RIGS Statement of Interest:

The site provides an example of an enigmatic and complex set of depositional landforms, debate about the origin of which has recently been rekindled. The possible origins range from glacial to protalus (pronival rampart) and paraglacial processes (including debris flow).
